Introduction

A marking scheme to evaluate the continuous professional development (CPD) activities of the members of the College of Pathologists of Sri Lanka has been a much-needed requirement for a long time. It is in this context that the first version of the CPD marking scheme was formulated in 2013 by the College of Pathologists of Sri Lanka. The members of the continuous professional development subcommittee 2021, formulated the current marking scheme to incorporate the common activities performed by the members of the College of Pathologists of Sri Lanka, correlating broadly with the main categories of activities evaluated by the Sri Lanka Medical Association.

The main categories that were considered when formulating this marking scheme were

1) Knowledge, skills development and changes in performance; 2) Research, publications and innovations; 3) Leadership and teamwork skills; 4) Communication and information technology skills; 5) Teaching and mentoring skills. The activities related to the field of histopathology were included as much as possible under these main categories.

The CPD subcommittee acknowledges the guidance given by Prof. Indika Karunathilaka, of the Department of Medical Education, Faculty of Medicine, Colombo for his guidance in formulating this marking scheme.

The members of the CPD subcommittee hope that this marking scheme will be used by the members of the College of Pathologists of Sri Lanka to enhance their personal and professional development and to develop the field of pathology in Sri Lanka.

Continuous Professional Development Marking Scheme

Formulated by the College of Pathologists of Sri Lanka, 2021

Component	Criteria for	Category	Point	Max.
